1.   Aussie Skate™ competitions use the 6.0 system of judging

2.   Scale of marks to be used in judging ranges from 0.0 to 6.0.

3.   All judging shall be done and marks entered on the judge's sheet immediately after each skater has performed

4.   Closed marking is recommended

5.   For the Free Skate Events – the Presentation Mark breaks the tie.

6.   Use the spaces below each listed element on the Judges Sheets to make comments, write + or -, use checks, or any other grading system to rate skaters' elements.

7.   Use the Marks category for the final score.

8.   Judges must be familiar with the required elements in each level. Discuss the base mark point value and recommended list of deductions with your judging panel BEFORE the competition:

      0.2   For each element included from a higher level
      0.1   Omission of required element
      0.1-0.2   Not according to the requirements/rules

      Falls and poor quality can be reflected in a lower base mark.

9.   The Referee should have an Aussie Skate™ Competition Manual, an Aussie Skate™ Handbook, a copy of the Competition Announcement with them during the competition. When a skater performs an element from a higher level, the necessary deductions should be applied.
